

Dao Chan Hung (Ethan)

Frontend Engineer (ReactJS / React Native)

Dob: 09/11/1998

Gender: Male

Phone: 0971801150

Email: hungka665@gmail.com

Website: <https://www.linkedin.com/in/dao-chan-hung-ethan-449418162>

Address: Hanoi, Vietnam

OBJECTIVE

Frontend Engineer with 5+ years of experience specializing in ReactJS, React Native, and TypeScript development.

Experienced in building scalable web/mobile applications, optimizing performance, integrating APIs, and maintaining CI/CD workflows.

Strong background in modern frontend architecture, state management, responsive UI/UX, and cross-functional collaboration with QA, Backend, and Product teams.

Comfortable working in Agile/Scrum environments and communicating in English for technical discussions and daily collaboration.

WORK EXPERIENCE

10/2023 - Present	MOR Software Frontend Engineer (ReactJS / React Native) Main responsibility: • Developed and maintained web/mobile applications using ReactJS, React Native, and TypeScript. • Built scalable frontend architectures with reusable components, state management, and API integration. • Optimized application performance, bundle size, and API handling for better user experience. • Participated in system architecture discussion, technical estimation, and code reviews. • Worked closely with Backend, QA, and Designers in Agile/Scrum environments. • Managed CI/CD workflows and deployment processes using GitHub Actions, AWS, and EAS Build. • Researched and utilized AI-assisted development workflows using Cursor AI, ChatGPT, GitHub Copilot, MCP-based tooling, and AI agent integrations to improve engineering productivity. • Participated in debugging production issues, maintaining applications, and supporting release processes.
06/2021 - 10/2023	Sotatek JSC React native developer Main responsibility: • Developed applications using React Native & Typescript • Participate in fixing bugs, maintaining the app
01/2021 - 06/2021	Thudo Multimedia React native developer Main responsibility: • Design ux-ui Web, Application with Figma. • Developed application using React Native. • Participate in fixing bugs, maintaining the app.

SKILLS

Frontend - ReactJS, React Native, Next.js

	- TypeScript, JavaScript (ES6+)
State Management	- HTML5, CSS3, SCSS, TailwindCSS, Ant-design - Zustand - Redux Toolkit - TanStack Query
Routing	- React Router - TanStack Router
Build & Tooling	- Vite - Webpack - Babel - ESLint / Prettier / Husky
Testing	- Jest - React Testing Library
Mobile	- ReactNative Expo + CLI - Android Studio/Xcode - EAS Build
Backend / APIs	- REST API - GraphQL - Firebase - WebSocket
Cloud & DevOps	- AWS S3 - CloudFront - GitHub Actions - Docker (basic)
AI Productivity & Engineering	- Integrated AI tools into daily engineering workflows to accelerate development productivity - Experience working with AI agent-based development environments and MCP integrations - Utilized AI-assisted workflows for architecture exploration, debugging, CI/CD troubleshooting, and documentation - Familiar with developer automation and AI-enhanced engineering practices
Others	- Git - Figma - Agile/Scrum - Jira
English	- Able to communicate in English for daily work, technical discussions, and collaboration with overseas clients.

PROJECTS

02/2026 - Present	Pochi App Non-custodial Solana mobile wallet/payment application designed for Solana Mobile (Seeker) ecosystem and dApp Store distribution. Customer: Internal company project Team size: 3 members Position: Frontend Engineer
-------------------	--

Responsibilities:

- Developed cross-platform mobile wallet application using React Native and Expo.
- Integrated Solana Mobile Wallet Adapter (MWA) for wallet connection and transaction signing.
- Implemented transaction flows, QR payments, token balance management, and transaction history features.
- Optimized RPC request handling, caching strategies, and mobile performance.
- Managed Android builds, EAS deployment, and dApp Store release workflows for Seeker devices.
- Researched AI-assisted development workflows using Cursor AI, MCP tooling, and AI agent integrations.

Technologies:

React Native, Expo, TypeScript, Solana, Mobile Wallet Adapter, SQLite, Zustand, EAS Build

04/2025 - 02/2026	WebMeet Realtime online meeting platform supporting screen sharing, synchronized media playback, collaborative tools, and live communication features. Customer: US Team size: 5 members Position: Frontend Engineer Responsibilities: • Developed and maintained scalable frontend applications using ReactJS, TypeScript, and Vite. • Built realtime collaboration features using WebSocket and Amazon Chime SDK. • Implemented synchronized video playback, screen sharing, and meeting management features. • Optimized frontend performance, API handling, and application stability. • Managed CI/CD workflows and deployment using GitHub Actions, AWS S3, and CloudFront. • Collaborated with Backend, QA, and Product teams in Agile/Scrum workflows. Technologies: ReactJS, TypeScript, Zustand, TanStack Query, Vite, AWS, Amazon Chime SDK, GitHub Actions
-------------------	--

08/2024 - 04/2025	Kikan Manufacturing and business operation management system supporting machining orders, reporting, and operational workflows. Customer: Japanese enterprise client Team size: 6 members Position: Frontend Engineer Responsibilities: • Developed business management web application using NextJS and TypeScript. • Built reusable UI components using Ant Design. • Integrated backend APIs and managed application state using TanStack Query and Zustand. • Implemented reporting/export features for Excel/PDF documents. • Participated in requirement analysis, feature enhancement, and maintenance tasks.
-------------------	---

- Collaborated with cross-functional teams in Agile development processes.

Technologies:

NextJS, TypeScript, TanStack Query, Zustand, Axios, Ant Design

01/2022 - 10/2023	NVX CEX Exchange App Cryptocurrency exchange platform enabling users to buy, sell, and trade digital assets. Customer: Indonesian client Team size: 15 members Position: Frontend Developer Responsibilities: • Developed frontend features for cryptocurrency trading platform using ReactNative. • Integrated REST APIs and realtime communication features using Socket.IO. • Implemented notification systems using Firebase. • Collaborated with Backend and QA teams to deliver new trading features. • Participated in bug fixing, production support, and feature maintenance. Technologies: ReactNative, Redux, Socket.IO, Firebase, Axios
-------------------	---

EDUCATION	
2017 - 2021	Graduated from Hanoi National University of Education Major: Information Technology
